PRODUCT INFORMATION SHEET

MILECHLOR

Heavy Duty Chlorinated Cleaner/Sanitiser

DESCRIPTION

MILECHLOR is a heavy-duty liquid chlorinated foaming cleaner/sanitiser.

MILECHLOR has been formulated to remove fat, blood, greases, oils, and carbonised soils from most washable surfaces.

MILECHLOR contains a blend of high foaming surfactants, which assist with cleaning and create a dense foam that clings to vertical surfaces for extra contact time.

Not recommended for use on aluminium or galvanised equipment, high alkalinity may cause damage to surface. Ensure all contact surfaces are rinse thoroughly after use.

The use of a substantive sanitation agent is recommended after use to ensure optimum surface hygiene.

DIRECTIONS FOR USE

MILECHLOR can be used through airless or compressed air foam generators. Pre-diluted to suit the type and degree of soil present.

Use 20-50ml of MILECHLOR per 1L of water, foam the surface to be cleaned, leave for 2-5 minutes, scrubbing if necessary. Rinse and allow to air dry.

For optimal hygiene, spray surfaces with substantive sanitiser (**MILEQUAT**) as per label directions for use.

NOTE: Rinse all contacted surfaces with potable water after using this product. Do not allow product to dry on surface.

Contains: Potassium Hydroxide 10-20%. Sodium Hypochlorite 4% (as available chlorine).

Ideal for food manufacturing & meat processing plants
