PRODUCT INFORMATION SHEET

UNIPOL

Self Polishing Liquid Floor Polish

DESCRIPTION

An acrylic co-polymer sealer-finish formulated for all floors where a daily ultra-high speed maintenance program is utilised. Burnishing achieves a brilliant “wet look shine” non-slip finish.

DIRECTIONS FOR USE

To produce a hard, dry, non-slip film giving lasting protection and a beautiful gloss; follow these steps.

Preparation - Prepare floors by removing all old polish and build up using **UNISTRIP**. See **UNISTRIP** label for dilution and directions for use.

Resealing - When floor has dried after stripping, apply one thin coat of **UNIPOL** and allow to dry. **DO NOT Buff the floor.** Allow 1 hour, and repeat; applying a second thin coat. Inspect the floor for finish, and if necessary apply a third thin coat of **UNIPOL** and allow to dry. The floor is now completely resealed and ready for use. **UNIPOL** may be buffed using a High Speed and/or an Ultra-High Speed polishing machine after second coat and final coats.

Daily Maintenance - Mop floors daily with a solution from our **PROOF RANGE**, in accordance with recommended instructions. Allow drying and buff lightly, where necessary. Bad scuff marks should be removed by rubbing with fine ‘grade-0’ steel wool pads, dipped in **UNIPOL**. Buff floor after **UNIPOL** has dried.

Non-Slip finish with a beautiful, glossy shine!
