

75% ALCOHOL WIPES

ANTIBACTERIAL SURFACE WIPES

DESCRIPTION

These Antibacterial Surface Wipes come in a soft plastic pack of 80 with a hard snap-cap closure. This feature avoids wipes from drying out between use. 75% Ethanol (Alcohol), Antibacterial Surface Wipes kill 99.99% of germs and are fragrance free.

DIRECTIONS FOR USE

Simply lift open the snap-cap to remove an antibacterial wipe. For best results, apply to dry, previously cleaned surfaces in a normal wiping motion. Alcohol Wipes will assist in the hygienic cleaning of a surface and will remain effective while the cloth remains moist. Disinfecting means using chemicals to kill germs (bacteria and viruses) on surfaces. It is important to clean before disinfecting because dirt and grime can reduce the ability of disinfectants to kill germs. Disinfectants containing $\geq 70\%$ alcohol are suitable for use on hard surfaces (that is, surfaces where any spilt liquid pools, and does not soak in).

Kills 99.99% of Germs

- 75% Ethanol (Alcohol)
- Fragrance Free
- Plastic snap cap closure
- 80 sheets - 20cm x 15cm
