

Aqueous Coated Double Wall Cup

8oz Squat, 12oz & 16 oz - One Lid Fits All

DESCRIPTION

Aqueous Coated Double Wall Cup, perfect for enjoying hot beverages on the go. Made from durable white paper with a double-wall design, these cups keep drinks at the ideal temperature while keeping your hands cool.

The food-grade aqueous coating ensures a safe and enjoyable drinking experience, reflecting our commitment to environmental sustainability. These eco-friendly cups are suitable for coffee, tea, lattes, hot chocolate, and mochas.

The cups are home compostable, offering a guilt-free disposal option. The aqueous coating is biodegradable, breaking down harmlessly without the need for special recycling facilities.

This makes our cups a responsible choice for eco-conscious consumers, as they reduce waste and environmental impact.

Heat and Cold Resistance

These biodegradable disposable coffee cups offer excellent heat resistance, withstanding high temperatures without deforming. Their outer layer prevents burning, ensuring a comfortable grip. Additionally, they can also hold ice cream and other cold beverages without losing their structure.

WHAT IS AN AQUEOUS CUP?

Water-based coating: The primary feature is that the coating used on the cup is made from water-based materials, not petroleum-based plastics.

Sustainability: This type of coating often allows the cups to be certified as compostable, making them a more eco-friendly option.

Bamboo fibre: Aqueous cups are made from bamboo fibre, a renewable resource, further enhancing their sustainability profile.

Usage: These cups are suitable for hot beverages like coffee and tea due to their water-resistant coating.

Please note, these cups are not suitable for microwaves, ovens, or long-term refrigeration.

Compostable and Recyclable
Fully compostable in home environments, reducing environmental impact

Pair with the PLA Compostable Coffee Cup Lid - One Lid Fits All
