

we have the solutions

# TerraCyclic

## A REVOLUTIONARY SOLUTION FOR THE DISPOSAL OF SANITARY PRODUCTS.

### What makes our sanitary unit so green?

The sanitary system and its disposable 'lid and liner cartridge' solution use a unique biodegradable additive, developed by ECM BioFilms Inc. These biodegradable additives have been designed to help break down plastics better and faster, providing a greener alternative. Conventional plastics without these additives tend to break down very slowly, taking decades or even centuries.

TerraCyclic Set (BIN & 1xBAG)

TERRACCM

Replacement Bag (Each)

The TerraCyclic Bio Bin is a sanitary waste disposal system. Its unique cartridge means no cleaning, less waste, saving costs and reducing energy use. The TerraCyclic Bio Bin is a sleek cylindrical unit and is compact and unobtrusive.

The cartridges are made using biodegradable plastic additives, which are completely safe to return to the earth through normal refuse disposal. The domed lid gives users the option to dispose of dressings without touching the outer areas.
